Compulsory Task 1

I am excited to learn Python coding language at a Software Engineering Bootcamp as it will provide me with a valuable skill, used by many leading technology companies. From looking at backend development roles I can see employers look for individuals who are able to understand python, by the end of this course I will be confident in my ability to fulfil this requirement. The bootcamp I am completing covers a wide range of python knowledge, from writing pseudo code (being able to write step by step computer logic prior to writing the code) to different types of loops (for, while) as well as learning to write functions and handle errors. All of these are important skills used everyday by Python coders. During this bootcamp I am also planning to build a Github portfolio of projects, prospective employees often request to see your profile so they can see your code first-hand.

I enjoy working in the technology industry as it is dynamic and challenging, two things I value for career satisfaction. Technology is now an integral part of our society whereby many daily tasks are completed with the help of technology, therefore I see this industry continuing to become more prevalent and therefore greater job opportunities. In the long run I would love to be able to be self-employed and in control of the work I agree to take on as well as the hours I work. This is a particularly attractive idea for when I become a mother when I am older.

Compulsory Task 2

Build Your Brand I: Thinking about a job search

If you're self-employed:

Input the contact details of companies and the business contacts of places you would pitch your services or products to. Also, please fill in the section right at the end of the form.

If you are ready to apply for jobs:

You won't actually be applying in this task, but we would like you to think about the sort of roles you might like to apply for and the sort of companies you might want to work for. Find 2 junior tech roles currently being advertised, ensuring you consider large and small companies as well as tech startups. For each of these, identify the recruiting/hiring managers (possibly the Talent or HR people at each company). Capture the details of each of the 2 roles and contacts in this form. If any of your URLs are greater than 255 characters, shorten them by using bitly.com and paste the shortened version into the form.

If you're not ready to apply for jobs yet or may even be currently employed and not looking for a new role right now:

We still require you to identify relevant contacts and get into practice should you eventually look for a new role. However, we will NOT reach out to these employers on your behalf. Please also fill in the contact at your current company who would be involved in a change to tech.

in the con	tact at your current c	ompany wno wou	a be involved	in a change	to tecn.
